

Location
Brisbane Australia

127 Charlotte St Brisbane

STRUCTURAL

Brisbane Australia

The project is a boutique development with 144 architecturally designed one and two-bedroom apartments and residential facilities, including pool and relaxation deck, sauna and gymnasium.

The Charlotte Street tower is a tall and slender building relative to the size of the footprint. ADG designed the core to ensure the building has lateral stability equal to requirements.

This site, situated in the inner Brisbane CBD posed a number of problems including limited access & site storage which needed to be overcome in order to ensure the success and on time delivery of this project. Currently under construction, this project is due for completion in late 2012.
